

ReadMeFirst : Aspiration Pneumonia Simulation

- Detailed Description:
 - Designed for nurses, respiratory therapists, physicians and clinical trainers, it helps develop skills in the detection, diagnosis and treatment of this serious respiratory condition.
 - The videos cover:
 - Recognition of signs of aspiration pneumonia
 - Airway management and respiratory support
 - Antimicrobial therapy and drug delivery
 - Clinical decision-making in the management of aspiration pneumonia
 - Involvement of a multidisciplinary team in treatment and care planning.
 - Ideal for respiratory care, critical care scenarios, and infection management training, using VR to simulate real-world clinical challenges.
- Access: Headset → Library → YouTube VR → Account & Settings → Playlists → Bronchiolitis simulation
- Procedure:
 - Open YouTube VR
 - Click on the profile icon at the top of the screen.
 - Select the playlist "Aspiration Pneumonia simulation" and then the desired scenario.
 - Make sure you are in immersive mode for the best experience.
- Controls:

- Turn your head to explore the scene in 360°.
 - No active interaction (observation mode).
- Objective:
 - Observe critical steps in the management of aspiration pneumonia.
 - Use as a teaching aid to strengthen clinical skills in respiratory care.
