ReadMeFirst : VirtualSpeech

- Detailed Description:
  - VirtualSpeech is a training tool for improving your soft skills. With AI-powered avatars, real-time feedback, and realistic environments, you'll improve your workplace skills in areas such as presentations, leadership, sales, difficult conversations, and more.
  - Practice in over 50 environments where you're safe to learn from mistakes with no real-life consequences.
  - Features include:
    - AI-powered roleplay conversations
    - Real-time feedback on performance
    - Record your presentations and body language
    - Practice in augmented and mixed reality (MR/AR)
    - 30+ training modules
    - Add your slides, notes, and questions
    - Wide range of supported courses
  - App Guide and how to use the features: https://virtualspeech.com/app-guide
- Access: Headset → Library → VirtualSpeech
- Procedure:
  - Choose a scenario (presentation, interview).
  - Activate the microphone to speak.
- Controls: Point with the controller to interact.
- Objective: Practice giving a speech and receive AI feedback.
