

Use the JGH mobile app and find your way!

The mobile application created by the Jewish General Hospital Users' Committee aims to improve the experience within the hospital of patients, visitors, caregivers, volunteers, staff and suppliers.

Purpose

- Orient users and help them navigate efficiently throughout the hospital
- Provide digital access through useful information
- Survey users to determine their satisfaction and measure the quality of their experience

The interactive map

- Indicates the shortest and simplest path to practically any destination within the hospital
- Provides step-by-step written directions to help users navigate from point A to point B
- Depicts specific areas in the hospital

Many useful features

By selecting the following icons, users can:

Learn more about the role of the Users' Committee

Navigate their way in the hospital using a 3D interactive map

Discover recent projects funded by the Users' Committee

Obtain information about their rights and responsibilities

Provide feedback on their experience by answering two anonymous questions

More to come, including

- Translation into other languages, in addition to English and French
- Support for visually impaired users who need specialized assistance
- Useful information about the Emergency Department, as well as news and updates from the Communications team

Free

User-friendly

On Apple and Android phones
